For Immediate Release

**Collection of Research Papers on Himalayan Earthquake History
Made Public by SSA**

SAN FRANCISCO (April 28, 2015)—In response to the April 25 earthquake in Nepal, the Seismological Society of America (SSA) is releasing a collection of previously published papers that examine the tectonics, structure and earthquake history of the Himalayas.

“To foster the exchange of information about this region, we are making research papers published by the Society’s two journals available to the public,” said SSA President Ruth Harris.

The selected papers were previously published in SSA’s two peer-reviewed journals, *Seismological Research Letters* (SRL) and the *Bulletin of the Seismological Society of America* (BSSA). Additional articles may be added to the collection, which will be publicly available until June 30, 2015.

Below are links to the online articles. Older articles are available only as a PDF file and will need to be downloaded prior to viewing. For more recent articles, an abstract will offer the reader a choice to either download the PDF or read the full text online.

The Nepal Virtual Issue is available at BSSA Online and GeoScienceWorld.org. Direct URLs for the collection contents page are:

http://www.bssaonline.org/site/misc/NepalVirtualIssue.xhtml?fm_preview=1

and

http://bssa.geoscienceworld.org/site/misc/NepalVirtualIssue.xhtml?fm_preview=1

The collection can also be reached from the Special Issues page on either site:

<http://bssaonline.org/site/misc/specialissue.xhtml>

and

<http://bssa.geoscienceworld.org/site/misc/specialissue.xhtml>

The following is a current list of papers included in the collection:
